

FARM & WILDERNESS

Dear Family Camp Participant(s),

KEEPING OUR COMMUNITY HEALTHY.

- Partnership with all our camp families is critical in ensuring that family campers enjoy a fun and safe week at Farm & Wilderness (F&W). Camp is a unique congregate setting different from your own home. It is paramount that everyone arrives at camp healthy with no covid, cold or other communicable illness.
- We ask that families take a **Pre-arrival Rapid Antigen Test (RAT) 24 hours in advance of their arrival** and show proof of that in a picture upon arrival at camp. Take a picture of each family-camper holding their negative test. Please be sure to save this on your phone as there is no cell reception or wi-fi at the entrance to camp. If you forget to test, one will be performed at camp before entering Firefly Song.
- If you or any member of your Family Camp group become ill or contract a communicable illness before camp, **PLEASE CONTACT ADMISSIONS RIGHT AWAY** to make a plan. It is likely you will need to delay arrival. For communicable illness at camp or a positive covid test at entry, we ask that folks head home to rest and recover, camp is not a setting to recover from illness. In this case, sharing is not caring 😊.
